ANKIT ANAND

Solution Architect | GenAI Engineer

German Permanent Resident

Email: anand.ankit093@gmail.com

Languages: German B1, English C1
Location: Ulm, Germany
LinkedIn: Ankit_LinkedIn
Medium: Ankit_Medium

GenAI and Agentic AI Engineer with 9+ years of experience across Retail, Fintech, Telecom and Defense. Specialised in multi-agent and agentic architectures (LangGraph, CrewAI, MCP, RAG, Neo4j knowledge graphs), backed by strong distributed systems, Java/Spring Boot microservices and cloud & DevOps expertise on Azure.

WORK EXPERIENCE

Senior Software Engineer — Solution Architect & GenAI Engineer
09.2022 - current

QVC (Qurate Retail Group), Centre of Excellence – AI (COE-AI) | Düsseldorf, Germany

- Managed an offshore Accenture vendor team; drove delivery planning, code quality and on-time execution across the engagement
- Built a Neo4j knowledge graph for semantic video-catalogue search, modelling 40K+ entities (assets, SKNs, hosts, scenes) interconnected by 500K+ typed relationships; exposed the graph as an MCP-server API consumed by an agentic bot, accelerating clip discovery and reuse for the QVC video team
- Architected a LangGraph agentic system delivering 360° SKN/SKU product intelligence; autonomously dispatched inventory alarms with fulfilment recommendations to planning teams
- Built custom MCP servers and a GenAI-accelerated pilot with GitHub Copilot; designed, built and shipped an end-to-end product to production in 2 weeks, achieving 90% code coverage and cutting go-to-market time by 70%
- Architected the TikTok Shop marketplace integration with event-driven Java/Spring Boot microservices and marketplace-specific connectors (webhook receiver, order & fulfilment connectors, product-price processor); communicated via regional Kafka topics and a shared Common API Model, extensible to Meta, YouTube and Shopify
- Designed and implemented a centralised product cache as part of Platform Engineering; reduced primary database hits by 30%

Software Engineer
11.2021 - 08.2022

360T (Deutsche Börse Group) | Frankfurt, Germany

- Designed a real-time currency pair data visualisation interface (Digitec GmbH); created a new revenue stream
- Implemented and deployed post-trade adapters onboarding 15+ clients including Barclays, BMW and Commerzbank; consulted on 20+ client implementations across Swap, Spot and Crypto trade types
- Designed an email-based trade failure alarm system; improved incident turnaround time by 70%
- Built multiple integration workflows using Apache Camel; supported production and gathered client requirements

Software Engineer
04.2019 - 10.2021

Manhattan Associates (R&D) | Bengaluru, India

- Built a cost allocation framework library for logistics shippers; achieved 99% calculation precision
- Designed and delivered a carrier partner web portal; enabled a new business revenue stream
- Owned 3 microservice-based systems end-to-end across design, development, deployment and support
- Conducted bug-bash sessions on legacy systems; maintained defect levels below threshold

Software Engineer
07.2017 - 03.2019

Nokia (R&D) | Bengaluru, India

- Built an OTDR UI and backend system for optical network alarm tracking and scan automation for clients including Reliance and PTCL
- Extended Nokia OMS Software with multi-network card support (11QPA4, SFD); redesigned service discovery routing at the OTU-ODU layer of OTN

Research Intern
01.2016 - 02.2016

Defence Research & Development Organisation (DRDO) | Bengaluru, India

- Developed a C/ASM module for salt & pepper noise removal and correlation-based object tracking in surveillance systems
- Presented at the Embedded Systems Conference, NIMHANS, Bengaluru, 2016

EDUCATION

B.E. Electronics & Communications Engineering 06.2013 - 08.2017
Bangalore Institute of Technology | Bengaluru, India
Final Grade: First Class with Distinction

COMPETENCIES

Languages & Frameworks
Java 21 | Python | Spring Boot | Spring Reactive | Spring Cloud | FastAPI | Express (Node.js) | Apache Camel | JPA

AI & GenAI
Azure OpenAI | LangGraph | LangChain | CrewAI | Model Context Protocol (MCP) | GitHub Copilot | Vector Embeddings | Vector Databases (Cosmos DB, Neo4j) | Agentic Systems

Web & Frontend
RESTful Web Services | React | JavaScript | Apache Tomcat

Databases
MySQL | Oracle | PostgreSQL | Couchbase | Cosmos DB | Neo4j | Elasticsearch | MyBatis

Infrastructure, Tools & Cloud
Apache Kafka | Docker | Kubernetes | Jenkins | Spinnaker | Kibana | Grafana | Git | Maven | Gradle | Microsoft Azure | AWS

Industry Experience
Retail | Fintech | Telecom | Supply-Chain | Defense

LANGUAGE PROFICIENCY

German – B1 (ongoing – working towards B2)
English – C1

CERTIFICATIONS

- Introduction to Agent Skills – Anthropic 03.2026
- Model Context Protocol: Advanced Topics – Anthropic (ID: 55xbqo927dse) 03.2026
- AI Agents Fundamentals – Hugging Face (ID: Ankit0311) 01.2026
- Fundamentals of MCP – Hugging Face (ID: Ankit0311) 01.2026

HOBBIES AND INTERESTS

- Travelling and exploring new cultures
- Writing technical articles on Medium — medium.com/@anand.ankit093
- Investing and personal finance

ADDITIONAL INFORMATION

- Holder of German permanent residence permit (Niederlassungserlaubnis)
- Open to relocating for opportunities
- References available upon request
